
Basel III- Pillar III Disclosures

September 30, 2020

Basel III-Pillar III Disclosures

ADDITIONAL DISCLOSURES IN TERMS OF COMPLIANCE OF BASEL III REQUIREMENTS AS STIPULATED BY RBI

Table DF – 1

Scope of Application

Name of the head of the banking group to which the framework applies: *Indian Bank*

(i) Qualitative Disclosures:

a. List of group entities considered for consolidation

Name of the entity / Country of incorporation	Whether the entity is included under accounting scope of consolidation (yes / no)	Explain the method of consolidation	Whether the entity is included under regulatory scope of consolidation (yes / no)	Explain the method of consolidation	Explain the reasons for difference in the method of consolidation	Explain the reasons if consolidated under only one of the scopes of consolidation
IndBank Merchant Banking Services Ltd. (Subsidiary)	Yes	Consolidated in accordance with Accounting Standard 21- Consolidated Financial Statement	Yes	Consolidated in accordance with Accounting Standard 21- Consolidated Financial Statement	Not Applicable	Not Applicable
Ind Bank Housing Ltd (Subsidiary)	Yes	Consolidated in accordance with Accounting Standard 21- Consolidated Financial Statement	Yes	Consolidated in accordance with Accounting Standard 21- Consolidated Financial Statement	Not Applicable	Not Applicable
Asrec (India) Ltd (Joint venture)	Yes	Accounting standard 27- Financial reporting of interests in joint ventures	Yes	Consolidated in accordance with proportionate consolidation method as per Accounting Standard 27- Financial reporting of interests in joint ventures	Not Applicable	Not Applicable
Universal Sompo General Insurance company Ltd (Joint venture)	Yes	Accounting standard 27- Financial reporting of interests in joint ventures	No	Not Applicable	Not Applicable	Regulatory Guidelines

Basel III-Pillar III Disclosures

Name of the entity / Country of incorporation	Whether the entity is included under accounting scope of consolidation (yes / no)	Explain the method of consolidation	Whether the entity is included under regulatory scope of consolidation (yes / no)	Explain the method of consolidation	Explain the reasons for difference in the method of consolidation	Explain the reasons if consolidated under only one of the scopes of consolidation
Tamil Nadu Grama Bank (Associates)	Yes	Consolidated under Equity Method in accordance with Accounting Standard 23- Consolidated Financial Statement	No	Not Applicable	Treated as associates	Risk weighted for capital adequacy purposes
Saptagiri Grameena Bank (Associates)	Yes	Consolidated under Equity Method in accordance with Accounting Standard 23- Consolidated Financial Statement	No	Not Applicable	Treated as associates	Risk weighted for capital adequacy purposes
Puduvai Bharathiar Grama Bank (Associates)	Yes	Consolidated under Equity Method in accordance with Accounting Standard 23- Consolidated Financial Statement	No	Not Applicable	Treated as associates	Risk weighted for capital adequacy purposes

b. List of group entities not considered for consolidation both under the accounting and regulatory scope of consolidation:

Name of the entity / country of incorporation	Principal activity of the entity	Total balance sheet equity (as stated in the accounting balance sheet of the legal entity)	% of bank's holding in the total equity	Regulatory treatment of bank's investments in the capital instruments of the entity	Total balance sheet assets (as stated in the accounting balance sheet of the legal entity)
NIL					

Basel III-Pillar III Disclosures

(ii) Quantitative Disclosures:

c. List of group entities considered for consolidation: (₹ in million)

Name of the entity / country of incorporation (as indicated in (i)a. above)	Principal activity of the entity	Total balance sheet equity (as stated in the accounting balance sheet of the legal entity)	Total balance sheet assets (as stated in the accounting balance sheet of the legal entity)
IndBank Merchant Banking Services Ltd (India)	Merchant Banking services	443.78	791.45
Ind Bank Housing Ltd (India)	Housing Finance	100.00	106.92
Asrec India Ltd (India)	Asset Recovery Company	980.00	2120.38
Universal Sompo General Insurance company Ltd (India)	General insurance company	3681.81	10812.46

d. The aggregate amount of capital deficiencies in all subsidiaries which are not included in the regulatory scope of consolidation i.e. that are deducted:

Name of the subsidiaries / country of incorporation	Principal activity of the entity	Total balance sheet equity (as stated in the accounting balance sheet of the legal entity)	% of bank's holding in the total equity	Capital deficiencies
NIL				

e. The aggregate amounts (e.g. current book value) of the bank's total interests in insurance entities, which are risk-weighted:

Name of the insurance entities / country of incorporation	Principal activity of the entity	Total balance sheet equity (as stated in the accounting balance sheet of the legal entity)	% of bank's holding in the total equity / proportion of voting power	Quantitative impact on regulatory capital of using risk weighting method versus using the full deduction method
NIL				

f. Any restrictions or impediments on transfer of funds or regulatory capital with in the banking group:

There is no restriction or impediments on transfer of funds or regulatory capital within the banking group.

Table DF – 2: Capital Adequacy

Assessment of Capital Adequacy:

(a) Bank maintains capital to protect the interest of depositors, general creditors and stake holders against any unforeseen losses.
 As per the RBI guidelines, Banks have to maintain a Minimum Common Equity Tier 1 (CET 1) of 7.375% (including Capital Conservation Buffer of 1.875%) and minimum CRAR of 10.875%. Bank maintains Common Equity Tier 1 (CET 1) of 10.57 % (Solo), 11.16% (Consolidated) and CRAR of 13.64 % (Solo), 14.22 % (Consolidated).

(b) In line with RBI guidelines, Bank has adopted following risk management approaches for assessing the capital adequacy:

- **Credit Risk:** Standardised Approach
- **Market Risk:** Standardised Duration Approach
- **Operational Risk:** Basic Indicator Approach

(c) Bank projects capital for the next 5 financial years based on business projections, policy guidelines, macro-economic scenarios, risk appetite etc

(d) Under Pillar II, Bank considers following risks while assessing / planning capital:

➤ Credit Concentration Risk ➤ Interest Rate Risk in the Banking Book ➤ Liquidity Risk ➤ Settlement Risk ➤ Compliance Risk ➤ Reputational Risk ➤ Model Risk ➤ Country Risk ➤ Compensation Risk ➤ Legal Risk	➤ Underestimation of Credit Risk under Standardised Approach ➤ Pension Obligation Risk ➤ Off-Balance sheet exposure Risk ➤ Technology Risk ➤ Outsourcing Risk ➤ Human Resources Risk ➤ Residual Risk ➤ Strategic Risk ➤ Un-hedged Foreign Currency Exposure Risk
---	--

(e) Bank also periodically undertakes stress testing in various risk areas to assess the impact of stressed scenario or plausible events on asset quality, liquidity, interest rate, derivatives and forex on its profitability and capital adequacy.

A comprehensive stress testing framework is put in place for the amalgamated entity with effect from 01.04.2020. Bank conducts stress test on quarterly basis based on scenarios prescribed by RBI as well as bank specific scenarios. The result of the same is placed to Credit Risk Management Committee (CRMC)/Risk Management Committee (RMC) /Board.

Basel III-Pillar III Disclosures

Quantitative disclosures (as per Basel III guidelines)

(a) Capital requirements for credit risk: (₹ in Million)

Particulars	Solo (Global)	Consolidated
Portfolios subject to standardized approach	2,64,196.81	2,64,265.06
Securitization exposures	--	--

b) Capital requirements for market risk:

Standardized duration approach (₹ in Million)

Particulars	Solo (Global)	Consolidated
Interest Rate Risk	13,664.52	13,664.52
Foreign Exchange Risk (including gold)	90.00	90.00
Equity Risk	3,379.69	3,468.32
Total	17,134.21	17,222.84

(c) Capital requirements for operational risk:

(₹ in Million)

Particulars	Solo (Global)	Consolidated
Basic Indicator Approach	23,718.06	23,771.48

(d) Common Equity Tier 1 (CET 1), Tier 1 and Total capital ratio (as per Basel III guidelines):

Particulars	Solo (Global)	Consolidated
Common Equity Tier 1 (CET 1),	10.57%	11.16%
Tier 1 Capital Adequacy Ratio	10.74%	11.33%
Total Capital Adequacy Ratio	13.64%	14.22%

Organisation Structure:

Risk Management Architecture:

The Bank's risk management framework is based on clear understanding of various risks, disciplined risk assessment and measurement procedures and continuous monitoring. An independent Risk Management Department is functioning for effective Enterprise-Wide Risk Management and responsible for assessment, monitoring and reporting of risk exposures across the bank. All the risks the Bank is exposed to, are managed through following three committees viz.,

- (i) Asset Liability Committee (ALCO)
- (ii) Credit Risk Management Committee (CRMC)
- (iii) Operational Risk Management Committee (ORMC)

These committees work within the overall guidelines and policies approved by the Board.

The Bank has put in place various policies to manage the risks. To analyze the enterprise-wide risk and with the objective of integrating all the risks of the Bank, an Integrated Risk Management policy (including Disclosure, Reputational & Strategic Risk Management) has also been put in place. The important risk policies comprise of Credit Risk Management Policy (part of Credit Policy), Asset Liability Management Policy, Policy on Market Risk Management, Operational Risk Management Policy, Internal Capital Adequacy Assessment Process (ICAAP) Policy,.

All the policies are reviewed at a minimum on annual basis by Risk Management Committee (RMC)/ Board. In order to disseminate the risk management concepts and also to sensitize the field level functionaries, the relevant policies are circulated to the branches, in addition to imparting training at the Bank's training establishments.

Credit Risk:

Risk Management Systems are in place to identify and analyze the risks at an early stage and manage them by setting and monitoring prudential limits besides taking other corrective measures to face the changing risk environment.

Limit Framework:

In order to limit the magnitude of credit risk and concentration risk, a limit framework has been laid down for following type of exposures:

- Single and group borrower exposure
- Sensitive sector exposure
- Unsecured exposure
- Country-wise exposure
- Internal rating wise exposure
- Term loan exposure
- Industry-wise exposure
- Interbank exposure

These exposure limits are monitored on regular basis and placed to various apex level committees of the Board.

Rating Model: All credit proposals are subject to a rigorous credit risk rating/scoring process to support credit decision making as well as to enhance risk management capabilities for portfolio management, pricing and risk based capital measurement.

Software driven rating mechanism is in place to assign the rating to ensure credit quality besides an entry level scoring system. The output of the rating models is used in decision making i.e. sanction, pricing and monitoring of credit portfolio. In order to ensure robustness of the rating models, the rating models have been subjected to validation by an external agency.

Scoring model: The Bank has harmonized the entry level scoring models for the amalgamated entity. All the fresh sanctions coming under structured loan products and other loans less than ₹ 5Millions are subjected to entry level scoring

Loan review mechanism and Credit audit system are in place for the periodical review/audit of the large value accounts and bring about qualitative improvements in credit administration of the Bank. In addition, Standard Assets Monitoring Committee reviews the Special Mention Accounts periodically to initiate timely action to prevent slippage of standard assets to non performing assets. As a part of monitoring mechanism, accounts which are downgraded from investment category are identified and monitored closely.

Migration analysis of ratings is done on quarterly basis. Also weighted average rating of industry-wise portfolio of the Bank is done on quarterly basis. Analysis of rating wise distribution of advances is also carried out on quarterly basis.

Adopting best risk management practices, credit proposals (except schematic loan proposals) coming under sanctioning powers of Corporate Office are scrutinised by the Risk Management Department.

Asset Liability Management:

Asset Liability Management framework facilitates bank to measure, monitor and control liquidity risk and interest rate risk on its balance sheet. This helps in providing suitable strategies for asset liability management. The asset liability management framework consists of the following key components

- Liquidity risk management
- Interest rate risk management
- Balance sheet and Basel III liquidity ratios
- Stress Testing and scenario analysis
- Contingency funding plan

Bank has set in place ALM policy to achieve two primary objectives as listed below:

Short Term Objective:

- To optimize the Net Interest Margin (NIM) of the Bank
- To provide adequate liquidity
- To manage re-pricing risk

Long Term Objective:

- To maximize the shareholder's wealth

Asset Liability Management is the function of Asset Liability Committee (ALCO). It operates under the guidance and supervision of the Board and/or Sub-Committee of Board on Risk Management. It meets at regular intervals to review the interest rate scenario, liquidity position, product pricing for both deposits and advances, maturity profile of the assets and liabilities, demand for Bank funds, cash flows of the Bank and overall Balance Sheet Management.

Liquidity risk is measured and monitored through two approaches-Flow approach and Stock approach. Flow approach involves comprehensive tracking of cash flow mismatches and is done through preparation of Structural liquidity statement on a daily basis. Appropriate tolerance levels/prudential limits have been stipulated for mismatches in different time buckets. Under Stock Approach various balance sheet ratios are prescribed with appropriate limits. The compliance of ratios to the prescribed limits ensures that the Bank has managed its liquidity through appropriate diversification and kept it within the sustainable limit.

For measurement and monitoring of Interest rate risk, currency wise, both Traditional gap approach and Duration gap approaches are followed. The short-term impact of interest rate movements on NIM is worked out through "Earnings at Risk" approach taking into consideration Yield curve risk, Basis risk and Embedded Options Risk. The long-term impact of interest rate movements on Market Value of

Equity is also worked out through Duration Gap approach. The monthly interest rate sensitivity statement is reviewed by ALCO and Quarterly interest rate sensitivity is reviewed by RMC.

Stress testing of liquidity risk and interest rate risk is conducted on regular interval as per the RBI defined and internally defined stress scenarios. The results from internal Liquidity stress testing are used to draw contingency funding plan under different liquidity stress scenarios.

In addition to the above, bank is computing Liquidity Coverage Ratio (LCR) as per latest guidelines issued by RBI and is using it as a risk measurement tool to manage short term liquidity. On a monthly basis LCR statement is reviewed by ALCO.

Market Risk Management:

Market risk is the possibility of loss caused by adverse movements in the market variables. The Bank for International Settlements (BIS) defines market risk as “the risk that the value of ‘on’ or ‘off’ balance sheet positions will be adversely affected by movements in equity and interest rate markets, currency exchange rates and commodity prices”. Thus, Market Risk is the risk to the bank’s earnings and capital due to changes in the market level of interest rates or prices of securities, foreign exchange and equities, as well as the volatilities of those changes. The objective of market risk management is to assist the business units in maximizing the risk adjusted return by providing analytics driven inputs regarding market risk exposures, portfolio performance vis-à-vis risk exposures and comparable benchmarks. Following risks are managed under Market Risk.

- Interest Rate Risk
- Exchange Rate Risk
- Equity Price Risk

The market risk may also arise from changes in commodity prices and volatility. However, Bank does not have any exposure to commodity related markets.

Market Risk Management (MRM) Framework of the bank is as follows:

- a) **Risk Identification:** Setting a framework for identifying, assessing and managing market risk in order to provide clarity on various dimensions of risk identification and recognition to each of the business functions.
- b) **Risk Measurement and Limits:** Bank recognizes that no single risk statistic can reflect all aspects of market risk. Therefore, various statistical and non-statistical risk measures are used to enhance the stability of risk measurement of market risk. Together, these risk measures provide a more comprehensive view of market risk exposure than any single measure. Market risk is managed with various metrics viz. Value at Risk (VaR), Earnings at Risk (EaR), Modified duration (MD), PV01 Limits, Net Overnight Open Position Limits (NOOPL), Individual Gap Limit (IGL) and Aggregate Gap Limit (AGL) currency wise and also through sensitivity analysis. Stress testing is also conducted on a regular basis to monitor the vulnerability of the bank to extreme but plausible unfavourable shocks.
- c) **Risk Monitoring:** Bank monitors and controls its risk, using various internal and regulatory risk limits for trading book which are set based on economic scenario, business strategy, management experience and Bank’s risk appetite. Rate scan is carried out to ensure that transactions are carried out at prevailing market rates.
- d) **Risk Reporting:** Mid Office monitors treasury operations on day to day basis. A daily report is placed to Chief Risk Officer and on monthly basis to ALCO. Stress testing is done for assessing market risk as per framework prescribed in Stress Test Policy and reported to ALCO on Quarterly basis.

Market risk management is governed by comprehensive board approved Policy on Market Risk Management and Stress Testing Policy to ensure that the risks spread across different activities carrying an underlying market risk are within the stipulated risk appetite of the bank. All the policies are benchmarked with industry-best practices and RBI regulations. The risk reporting mechanism in the Bank comprises disclosures and reporting to the various apex level committees.

Operational Risk:

Operational risk is now on the focus of intense interest among industry participants, regulators and other stake holders. The bank has put in place Operational Risk Management Frame work (ORMF) and Operational Risk Management systems (ORMS) to ensure effective governance, risk capture and assessment and quantification of operational risk. Operational risk is well managed by using appropriate qualitative & quantitative methods and established internal control systems in day to day management processes and adopting various risk mitigating strategies. The risk perceptions in various products / processes are critically analysed and corrective actions if required, are initiated.

Bank has implemented a web-based Operational Risk Management System to capture, measure, monitor and manage its operational risk.

Operational risk is also monitored through analysis of credit spurt and analysis of frequency and severity of operational losses.

Table DF-3
Credit Risk: General disclosures for all banks
Qualitative Disclosures:
(a) Credit Risk Management:

Credit risk is defined as the possibility of losses associated with diminution in the credit quality of borrowers or counterparties.

Architecture:

In adherence with various guidelines and leading industry practices, the Bank has set up a robust governance structure for the management of credit risk, ensuring an adequate oversight, monitoring and reporting. The framework establishes the responsibilities of the board of directors.

The Bank has established a Board level sub-committee known as 'Risk Management Committee (RMC)' constituted in terms of RBI guidance note on Risk Management system.

Risk Management Committee (RMC):

The RMC evaluates overall risks faced by the Bank and is responsible for the establishment of an effective system to identify measure, monitor and control risk and recommend to the Board for its approval, clear policies, strategy, risk appetite and credit standards.

The Board has delegated authority to the RMC for credit risk related responsibilities.

The committee oversees credit risk management and ensures that the principal credit risks facing the Bank have been properly identified and are being appropriately managed. The committee approves and periodically reviews the overall risk appetite and credit risk management strategy. The committee reviews the risk management policies, the Bank's compliance with risk management guidelines stipulated by the RBI.

The risk committee also reviews credit risk profile and any major development, internal and external, and their impact on portfolio and as a whole on the bank

Credit Risk Management Committee (CRMC):

CRMC deals with the issues relating to credit policy and procedures, and analyzes, manages and controls credit risk on a bank wide basis.

Loan Review Management Committee: (LRMC):

As a part of Credit risk management process, Loan Review Management Committee (LRMC), at Corporate Office, has been constituted to undertake review of borrowal accounts sanctioned by various Committees at CO and Zonal Credit Committee.

Definitions of past due and impaired (for accounting purpose)

Bank has adopted the definitions of the past due and impaired (for accounting purposes) as defined by RBI for Income Recognition and Asset Classification norms. Further, in line with RBI guidelines, the moratorium period, wherever granted, is factored in for the purpose of asset classification.

The policy of the bank for classifying bank's loan assets is as under:

Non Performing Asset (NPA): A non performing asset (NPA) is a loan or an advance where:

- Interest and/ or installment of principal remain overdue for a period of more than 90 days in respect of a term loan,
- The account remains 'out of order' in respect of an Overdraft/Cash Credit (OD/CC)
- The bill remains overdue for a period of more than 90 days in the case of bills purchased and discounted,
- The installment of principal or interest thereon remains overdue for two crop seasons for short duration crops
- The installment of principal or interest thereon remains overdue for one crop season for long duration crops

An OD/CC account is treated as '**out of order**' if the outstanding balance remains continuously in excess of the sanctioned limit/drawing power for more than 90 days. In cases where the outstanding balance in the principal operating account is less than the sanctioned limit/drawing power, but there are no credits continuously for 90 days as on the date of Balance Sheet or credits are not enough to cover the interest debited during the same period, these accounts are treated as '**out of order**'.

Non Performing Assets of the Bank is further classified in to three categories as under:

➤ **Sub standard Assets**

A sub standard asset is one which has remained NPA for a period less than or equal to 12 months.

➤ **Doubtful Assets**

An asset would be classified as doubtful if it has remained in the sub standard category for 12 months.

➤ **Loss Assets**

A loss asset is one where loss has been identified by the bank or by internal or external auditors or the RBI inspection.

In accordance with RBI guideline relating to Covid-19 Regulatory package dated 27th March 2020, 17th April 2020 and 23rd May 2020 and clarification issued by RBI through Indian Bankers Association, dated 6th May 2020 the Bank has granted moratorium on payment of instalments and/or interest, as applicable falling due between 1st March 2020 and 31st August 2020 (Moratorium period) to eligible borrowers classified as standard, even if overdue, as on 29th February 2020 without considering the same as restructuring. In accordance with RBI guideline Moratorium period where ever granted, is excluded by the Bank from the number of days past-due for purpose of asset classification under RBI's Income Recognition and Asset Classification norms. The Bank holds provision as at 30th September 2020 against the potential impact on covid-19 based on the information available up to a point in time. The following are the details of such accounts and provisions made by the Bank:

Basel III-Pillar III Disclosures

(₹ in Million)	
Particulars	As at 30.09.2020
Advance outstanding in SMA/overdue categories, where the moratorium/deferment was extended as per Covid-19 Regulatory package	21692
Advance outstanding where asset classification benefit is extended	21692
Provision made during Q2 of FY2020-21	Nil
Total provision held on 30.09.2020	6322*
Provision adjusted during Q2 of FY 2020-21	Nil

* Provision@15% aggregating to Rs.4369 Million against the accounts withstanding of Rs.20163 Million (Principal amount) which were standard as on 29.02.2020 but would have slipped to NPA/Sub-standard category as on 30.09.2020 had the RBI debt servicing relief as above not been reckoned.

* In respect of the above accounts, interest income aggregating Rs.1952 Million has been reckoned in operating profit and prudent measure an equal amount has been made as additional provision against those assets.

Credit Risk Management Policy:

The Bank has put in place the Credit Risk Management Policy (part of Credit Policy) and the same has been ported on Bank's intranet. The main objective of the policy is to ensure that the operations are in line with the expectation of the management and the strategies of the top management are translated into meaningful directions to the operational level. The Policy stipulates prudential limits on large credit exposures, standards for loan collateral, portfolio management, loan review mechanism, risk concentrations, risk monitoring and evaluation, provisioning and regulatory / legal compliance.

The Bank identifies the risks to which it is exposed and applies suitable techniques to measure, monitor and control these risks.

While the Board / Risk Management Committee of the Board devises the policy and fixes various credit risk exposures, Credit Risk Management Committee implements these policies and strategies approved by the Board / RMC, monitors credit risks on a bank wide basis and ensures compliance of risk limits.

Bank considers rating of a borrower as an important tool to measure the credit risk associated with any borrower and accordingly implemented rating software.

(b) Total gross credit risk exposures, Fund Based and Non-fund based separately.

(₹ in Million)		
Particulars	Solo (Global)	Consolidated
Gross Credit Risk Exposures		
Fund Based		
Loans and Advances	36,58,964.32	36,58,964.34
Investments	11,30,615.57	11,30,617.38
Other Assets	6,67,958.36	6,68,581.76
Total Fund Based	54,57,538.25	54,58,163.48
Non Fund Based including contingent credit, contracts and derivatives*	21,71,064.60	21,71,313.00
Total Credit Risk Exposure	76,28,602.85	76,29,476.47

*includes notional principles of derivatives exposures, fund based unavailed limits, LC, acceptances Guarantees

Basel III-Pillar III Disclosures

(c) Geographic distribution of credit risk exposures Fund based and Non-fund based (solo) separately
 (₹ in Million)

Geographical Region	Fund Based	Non Fund Based including contingent credit, contracts and derivatives	Total
Overseas	1,00,349.55	27,600.88	1,27,950.43
Domestic	53,57,188.71	21,43,463.72	72,87,645.48
Total	54,57,538.25	21,71,064.60	76,28,602.85

(d) Industry-wise distribution of exposures (solo) as on 30.09.2020

(₹ in Million)

	MAJOR INDUSTRIES/SECTORS	FB Exposure	NFB Exposure	COMMITTED EXPOSURE
1	Chemicals & Chemical Products			
1.1	Drugs and Pharmaceuticals	12975.09	1261.40	14236.49

Table DF – 4
Credit Risk: disclosures for portfolios subject to the standardized approach
Qualitative Disclosures:

(a) The Bank uses ratings assigned by the seven Rating Agencies approved by the Reserve Bank of India namely a) CRISIL, b) ICRA, c) CARE, d) India Ratings, e) BRICKWORKS f) Acuite and g) INFOMERICS for the eligible exposures such as Corporate, Public Sector Enterprises, Capital Market Exposures etc. according to the Basel III framework. For overseas credit exposure, bank accepts rating of Standard & Poor, Fitch, & Moody's.

The Bank has used the solicited ratings assigned by the above approved credit rating agencies for all eligible exposures, both on balance sheet and off balance sheet, whether short term or long term, in the manner permitted in the RBI guidelines on Basel III capital regulations.

Ratings published by the rating agencies on their website are used for this purpose. Only ratings which are in force as per monthly bulletin published in the website of the concerned rating agencies are taken into account.

For assets in the Bank's portfolio that have contractual maturity up to one year, short term ratings accorded by the chosen credit rating agencies are considered relevant. For other assets, which have a contractual maturity of more than one year, long term ratings accorded by the chosen credit rating agencies are considered relevant.

Long term/short term ratings issued by the chosen domestic credit rating agencies have been mapped to the appropriate risk weights applicable as per the standardised approach under Basel III capital regulations.

Use of multiple rating assessment:

- If there are two ratings accorded by chosen credit rating agencies that map into different risk weights, the higher risk weight are applied
- If there are three or more ratings accorded by chosen credit rating agencies with different risk weights, the ratings corresponding to the two lowest risk weights should be referred to and the higher of those two risk weights should be applied. i.e., the second lowest risk weight

Quantitative Disclosures:

(b) The total credit risk exposure (Solo-Global) bifurcated after the credit risk mitigation under Standardized Approach is as under:

(₹ in Million)

Solo (Global)	Book Value	Risk Weighted value
Below 100% Risk weight	59,39,616.72	11,37,015.79
100% Risk weight	9,26,708.98	6,12,804.84
Above 100% Risk weight	7,62,277.15	6,79,575.34
Total	76,28,602.85	24,29,395.97

The total credit risk exposure (Consolidated) bifurcated after the credit risk mitigation under Standardized Approach is as under:

(₹ in Million)

Consolidated	Book Value	Risk Weighted value
Below 100% Risk weight	59,40,000.97	11,37,056.21
100% Risk weight	9,27,133.19	6,13,229.05
Above 100% Risk weight	7,62,342.31	6,79,738.24
Total	76,29,476.47	24,30,023.50

Table DF-5 :Credit Risk Mitigation: disclosures for standardized approaches
Qualitative Disclosures

The Bank has put in place Credit Risk Mitigation & Collateral Management Policy (part of Credit Policy) with the primary objective of a) Mitigation of credit risks & enhancing awareness on identification of appropriate collateral taking into account the spirit of Basel III / RBI guidelines and (b) Optimizing the benefit of credit risk mitigation in computation of capital charge as per approaches laid down in Basel III / RBI guidelines.

The Bank generally relies on Risk Mitigation techniques like Loan participation, Ceiling on Exposures, Escrow mechanism, Forward cover, higher margins, loan covenants, Collateral and insurance cover.

Valuation methodologies are detailed in the Credit Risk Management Policy (part of Credit Policy).

Eligible collateral for which CRM benefit taken for Computation of Capital Charge as per RBI guidelines:

The following collaterals are recognized for availing CRM benefit for Computation of Capital Charge:

- i) Cash (as well as certificates of deposit or comparable instruments, **including fixed deposit receipts**, issued by the lending bank) on deposit with the bank, which is incurring the counterparty exposure.
- ii) Gold: Gold would include both bullion and jewellery. However, the value of the collateralized jewellery should be benchmarked to 99.99 purity.
- iii) Securities issued by Central and State Governments
- iv) Kisan Vikas Patra and National Savings Certificates provided no lock-in period is operational and if they can be encashed within the holding period
- v) Life insurance policies with a declared surrender value of an insurance company which is regulated by an insurance sector regulator
- vi) Debt securities rated at least BBB (-)/PR3/P3/F3/A3
- vii) Units of Mutual Funds

Main types of guarantor counterparty and their creditworthiness

The Bank considers credit protection in terms of the guarantees which are direct, explicit, irrevocable and unconditional. The bank takes into account such credit protection in calculating capital requirements

Only guarantees issued by entities with a lower risk weight than the counterparty will lead to reduced capital charges, since the protected portion of the counterparty exposure is assigned the risk weight of the guarantor, whereas the uncovered portion retains the risk weight of the underlying counterparty

Credit protection given by the following entities is recognised as counterparty Guarantor:

- (i) Sovereigns (Central and State Governments)
- (ii) Sovereign entities (including ECGC, NCGTC and CGTMSE)
- (iii) Banks with a lower risk weight than the counterparty

Basel III-Pillar III Disclosures

All types of securities eligible for mitigation are easily realizable financial securities. Hence, presently no limit / ceiling has been prescribed to address the concentration risk in credit risk mitigants recognized by the Bank.

The Bank uses the comprehensive approach in capital assessment. In the comprehensive approach, when taking collateral, the Bank calculates the adjusted exposure to a counterparty for capital adequacy purposes by netting off the effects of that collateral. The Bank adjusts the value of any collateral by a haircut to take into account possible future fluctuations in the value of the security occasioned by market movements.

Quantitative Disclosures

For each separately disclosed credit risk portfolio (Solo-Global / Consolidated), the total exposure (after, where applicable, on- or off balance sheet netting) that is covered by eligible financial collateral after the application of haircuts:

(₹ in Million)

Type of Exposure	Eligible financial Collateral	Guarantees
Gross Credit Risk Exposures		
Fund Based		
Loans and Advances	4,33,154.28	3,94,901.29
Investments	0.00	0.00
Other Assets	0.00	0.00
Total Fund Based	4,33,154.28	3,94,901.29
Non Fund Based including contingent credit, contracts and derivatives	43,728.77	4,358.48
Total	4,76,883.05	3,99,259.77

Qualitative Disclosures:	The Bank has not undertaken any securitization activity.
Quantitative Disclosures:	NIL

Table DF – 7

Market risk in trading book

Market Risk :

Market risk is the possibility of loss caused by changes in the market variables. The Bank for International Settlements (BIS) defines market risk as “the risk that the value of ‘on’ or ‘off’ balance sheet positions will be adversely affected by movements in equity and interest rate markets, currency exchange rates and commodity prices”. Thus, Market Risk is the risk to the bank’s earnings and capital due to changes in the market level of interest rates or prices of securities, foreign exchange and equities, as well as the volatilities of those changes. The objective of market risk management is to assist the business units in maximizing the risk adjusted rate of return by providing analytics driven inputs regarding market risk exposures, portfolio performance vis-à-vis risk exposures and comparable benchmarks. Following risks are managed under Market Risk.

- Interest Rate Risk
- Exchange Rate Risk
- Equity Price Risk

The market risk may also arise from changes in commodity prices and volatility. However, Bank does not have any exposure to commodity related markets.

Market Risk Management (MRM) Framework of the bank is as follows:

- a) **Risk Identification:** Setting a framework for identifying, assessing and managing market risk in order to provide clarity on various dimensions of risk identification and recognition to each of the business functions.
- b) **Risk Measurement and Limits:** Bank recognizes that no single risk statistic can reflect all aspects of market risk. Therefore various statistical and non-statistical risk measures are used to enhance the stability of risk measurement of market risk. Market risk is managed with various metrics viz. Value at Risk (VaR), Earnings at Risk, Modified duration, PV01 Limits, Net Overnight Open Position Limits (NOOPL), Individual Gap Limit (IGL) and Aggregate Gap Limit (AGL) currency wise and also through sensitivity analysis. Stress testing is also conducted on a regular basis to monitor the vulnerability of the bank to extreme but plausible unfavorable shocks.
- c) **Risk Monitoring:** Bank monitors and controls its risk, using various internal and regulatory risk limits for trading book which are set based on economic scenario, business strategy, management experience and Bank’s risk appetite. Rate scan is carried out to ensure that transactions are executed and revalued at prevailing market rates.
- d) **Risk Reporting:** Monitoring of Treasury operations is done by Mid Office and a daily report is put up to Chief Risk Officer. Capital charge on account of Market Risk is computed and reported to ALCO and Board on quarterly basis. Stress testing is done for assessing market risk by following assumptions prescribed in Stress Test Policy and reported to ALCO on Quarterly basis.

Market risk management is governed by comprehensive board approved market risk management policy, Integrated Treasury Management Policy, Stress testing and Derivative Policy to ensure that the risks spread across different activities carrying an

Basel III-Pillar III Disclosures

underlying market risk are within the stipulated risk appetite of the bank. All the policies are benchmarked with industry-best practices and RBI regulations. The risk reporting mechanism in the Bank comprises disclosures and reporting to the various apex level committees.

Quantitative Disclosures:

The capital requirements (Solo-Global / Consolidated) for:

(₹ in Million)

Particulars	Consolidated
Interest rate risk	13,664.52
Foreign exchange risk	90.00
Equity position risk	3,468.32
Total	17,222.84

Table DF – 8
Operational Risk

Qualitative Disclosures:

Operational risk is defined as the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. This definition includes legal risk, but excludes strategic and reputational risk.

Operational risk is now on the focus of intense interest among industry participants, regulators and other stake holders. The bank has put in place Operational Risk Management Frame work (ORMF) and Operational Risk Management systems (ORMS) to ensure effective governance, risk capture and assessment and quantification of operational risk exposure. Operational risk is well managed by using appropriate qualitative & quantitative methods and established internal control systems in day to day management processes and adopting various risk mitigating strategies. The risk perceptions in various products / processes are critically analysed and corrective actions if required, are initiated.

Bank has implemented a sophisticated web-based Operational Risk Management System to capture, measure, monitor and manage its operational risk exposure. Bank has built up internal loss data base for more than 10 years.

During the year, monitoring of operational risk through credit spurt and Analysis of frequency & severity of operational loss through statistical technique have been done

Capital charge for Operational Risk is computed as per the Basic Indicator Approach.

Quantitative Disclosures

The average of the gross income, as defined in the Basel III Capital regulations, for the previous 3 years i.e. is considered for computing the capital charge. The required capital is ₹ 23771.48 Million (Consolidated).

Table DF – 9
Interest Rate Risk in the Banking Book (IRRBB)
Qualitative Disclosures:

IRRBB refers to the potential adverse financial impact on the Bank's banking book from changes in interest rates.

The interest rate risk is measured and monitored through two approaches:

(i) Earning at Risk (Traditional Gap Analysis) :

The immediate impact of the changes in the interest rates on net interest income of the bank is analyzed under this approach.

(ii) Economic Value of Equity (Duration Gap Analysis):

Modified duration of assets and liabilities is computed separately to finally arrive at the modified duration of equity. This approach assesses impact on economic value of equity by assuming parallel shift in the yield curve for a given change in the yield. Impact on the Economic Value of Equity is also analyzed for a 200 bps rate shock as required by RBI. Market linked yields are used in the calculation of the Modified Duration.

The changes in market interest rates have earnings and economic value impacts on the bank's banking book. Thus, given the complexity and range of balance sheet products, IRR measurement systems are used that assess the effects of the rate changes on both earnings and economic value. Techniques followed are simple maturity (fixed rate) and repricing (floating rate) gaps and duration gaps based on current on-and-off-balance sheet positions, to a little higher technique that incorporate assumptions on behavioural pattern of assets, liabilities and off-balance sheet items and can easily capture the full range of exposures against basis risk, embedded option risk, yield curve risk, etc.

The analysis of bank's Interest Rate Risk in Banking Book (IRRBB) is done for Global position. Analysis note on the same on a monthly basis is placed to ALCO.

Quantitative Disclosures:

The impact on earnings and economic value based on interest rate shocks according to IRRBB (Solo-Global) computation methodology are given below:-

- i) Earnings at Risk for 25 bps interest rate shock as on for one year time horizon is ₹716.77 Million
- ii) Change in Economic Value of Equity for 200 bps interest rate shock is ₹39184.80 Million

DF-10: General Disclosure for exposures related to Counterparty Credit Risk:

Counterparty Credit Risk is the risk that the counterparty to a derivative transaction can default before the final settlement of the transaction's cash flow. The Bank sets limits as per the norms on exposure stipulated by RBI for both fund and non fund based facilities including derivatives. Limits are set as a percentage of the capital funds and are monitored on regular basis. For corporates the derivatives limits are assessed and sanctioned in conjunction with regular credit limit as part of regular appraisal.

All the Derivative transactions with the Counterparty are evaluated as per Board approved Derivative Policy of the Bank.

The derivative exposure calculated using Current Exposure Method (CEM) and outstanding as on is given below:

₹ in Million

Derivatives	Notional Principle	Current Credit Exposure(+veMTM)	Current Exposure
Forward Contracts	8,49,742.78	5,838.41	22,055.65
Interest Rate Swaps	0.00	0.00	0.00

Call Option	Call Option after fifth year and on every coupon anniversary date thereafter (i) Issuer Call: The issuer, with prior approval of RBI may at its sole discretion, having notified the Trustee not less than 21 calendar days prior to the date of exercise of such issuer call (Which notice shall specify the date fixed for exercise of the issuer Call (The "Issuer call date"), may exercise a call option on the outstanding Bonds. The Issuer Call, which is discretionary, may or may not be exercised on the fifth anniversary from the Deemed Date of

Basel III-Pillar III Disclosures

Allotment i.e. the fifth Coupon Payment Date or on any Coupon Payment Date thereafter. Further as per RBI guidelines, Bank must not exercise call option unless; the instrument should be replaced with capital of the same or better quality and the replacement of this capital is done at conditions which are sustainable for the income capacity of the issuer. Here, replacement of the capital can be concurrent with but not after the instrument is called.

OR

(i) The Issuer demonstrates that its capital position is well above the minimum capital requirements after the call option is exercised.

(ii) Here, minimum refers to Common Equity Tier 1 of 8% RWAs Including capital conservation buffer of 2.5% of RWAs) and Total Capital of 11.5% of RWAs including any additional capital requirement identified under Pillar 2.

(ii) Tax call: If a Tax Event (As described below) has occurred and continuing, then the issuer may, having notified the Trustee not less than 21 calendar days prior to the date of exercise of such Tax Call or Variation (Which notice shall specify the date fixed for exercise of the Tax Call or Variation "Tax Call Date"), may exercise a call on the Bonds or substitute the Bonds or vary the terms of the Bonds so that the Bonds have better classification.

A Tax event has occurred if, as a result of any change in, or amendment to, the laws affecting taxation or regulations or rulings promulgated there under in India or any change in the official application of such laws, regulations or rulings; the Issuer will no longer be entitled to claim adeduction in respect of computing its taxation liabilities with respect to coupon on Bonds.

The exercise of Tax Call by the Issuer is subject to requirements set out in the applicable RBI Guidelines (as defined below). RBI will permit the Issuer to exercise the Tax Call only if the RBI is convinced that the issuer was not in a position to anticipate the Tax Event at the time of issuance of the Bonds.

(iii) Regulatory Call: If a Regulatory Event (As described below) has occurred and continuing, then the issuer may, having notified the Trustee not less than 21 calendar days prior to the date of exercise of such Regulatory Call or Variation (Which notice shall specify the date fixed for exercise of the Regulatory Call or Variation "Regulatory Call Date"), may exercise a call on the Bonds and replace with the instrument with better regulatory classification or lower coupon with same regulatory classification with prior approval of RBI or substitute the Bonds or vary the terms of the Bonds so that the Bonds have better classification.

A Regulatory event is deemed to have occurred if there is a downgrade of the Bonds in regulatory classification e.g. Bonds are excluded from the regulatory Tier 1 Capital of the Issuer.

Basel III-Pillar III Disclosures

	The exercise of Regulatory Call by the Issuer is subject to requirements set out in the applicable RBI Guidelines (as defined below). RBI will permit the Issuer to exercise the Regulatory Call only if the RBI is convinced that the issuer was not in a position to anticipate the Regulatory Event at the time of issuance of the Bonds.

Table DF-15: Disclosure Requirements for Remuneration

-----Not applicable-----

As per RBI Master Circular on Basel III, this table is only applicable to all private sector and foreign banks operating in India.

Table DF-16: Equities-Disclosure for Banking Book Positions

Investments are classified at the time of purchase into Held for trade (HFT), Available for Sale (AFS) and Held to Maturity (HTM) categories in line with the RBI master circular on Prudential Norms for classification, valuation and operation of investments portfolio by Banks. Investments that are held principally for sale within a short period are classified as HFT securities. Investments that the Bank intends to hold till maturity are classified under the HTM category. Investments in the equity of subsidiaries/joint ventures are categorized as HTM in accordance with the RBI guidelines. All other investments are classified as AFS securities.

Equity investments under the HTM category are carried at acquisition cost. Equity investments under the banking book are the Bank's investments in subsidiaries and associates. As on 30.09.2020, Book value of equity shares under Banking book is ₹ 2521.02 million.

Investments in subsidiaries have been reduced from CET 1 and investments in associates have been risk weighted at 250%.
