

NET STABLE FUNDING RATIO (Consolidated) AS ON 31.03.2026

The Net Stable Funding Ratio (NSFR) is a significant component of the Basel III reforms. The NSFR promotes resilience over a longer-term time horizon by requiring banks to fund their activities with more stable sources of funding on an ongoing basis. The guidelines for NSFR were effective from October 1, 2021 and updated on Nov 28, 2025.

The NSFR is defined as the amount of available stable funding relative to the amount of required stable funding. "Available stable funding" (ASF) is defined as the portion of capital and liabilities expected to be reliable over the time horizon considered by the NSFR, which extends to one year. The amount of stable funding required ("Required stable funding") (RSF) of a specific institution is a function of the liquidity characteristics and residual maturities of the various assets held by that institution as well as those of its off-balance sheet (OBS) exposures.
